- US Steel

The TRRA was created in 1889 to have an efficient and economical way of interchanging passenger and freight traffic over the Mississippi River. Jay Gould created an agreement in 1889 between the Terminal Railroad Association of St. Louis and six proprietary railroads. The owners of the TRRA now are the UP, BNSF, CSXT, CN and NS. The TRRA owns and operates 2 bridges, a switch yard and several railroad routes in Missouri and Illinois. Both the TRRA bridges cross the Mississippi River, the MacArthur Bridge is 6.2 miles long and crosses in Downtown St. Louis and the Merchants Bridge is 0.5 miles long and crosses just north of Downtown St. Louis. The switch yard for the TRRA is located in Madison, IL.
