### Kansas City Southern Reports Third Quarter Results

**Kansas City, Mo., October 19, 2021.** Kansas City Southern (KCS) (NYSE:KSU) reported revenues of \$744.0 million, an increase of 13% from third quarter 2020. Overall, carload volumes were down 3% compared to prior year primarily due to the following commercial impacts:

- Auto plant shutdowns driven by a global microchip shortage;
- Service interruptions at Lazaro Cárdenas due to KCSM right-of-way blockages resulting from teachers' protests; and
- Increased regulation of refined fuel product shipments into Mexico resulting in supply chain disruptions.

#### **Third Quarter 2021**

Third quarter revenues were \$744.0 million, an increase of 13% primarily resulting from mix, higher fuel surcharge, and the strengthening of the Mexican peso against the U.S. dollar.

Third quarter operating expenses were \$492.1 million, including \$36.5 million in merger costs. Operating income was \$251.9 million and the reported operating ratio was 66.1%. Third quarter net income was \$156.5 million, or \$1.71 per diluted share. Adjusted third quarter operating income, operating ratio, net income, and diluted earnings per share were as follows:

"We are encouraged that despite several commercial headwinds, our network is performing extremely well and we are delivering near record velocity and dwell," stated Patrick J. Ottensmeyer, KCS president and chief executive officer. "Underlying industrial demand is strong, and KCS has maintained resources to prioritize customer service as volumes return to the network. As certain supply chain disruptions are resolved and our revenue environment improves, our network will be well-positioned to handle incremental volume while continuing to provide premium service to our customers.

"We are also very pleased to have announced our combination with Canadian Pacific, creating the first single-line rail network linking the U.S., Mexico and Canada. This historic combination will enhance competition, create new options for customers, and support economic growth in North America."

## Statement Regarding Non-GAAP Financial Measures

In addition to disclosing financial results in accordance with U.S. GAAP, the accompanying third quarter 2021 earnings release contains non-GAAP financial measures. KCS management believes that certain non-GAAP financial measures used to review and in certain cases manage the Company's business fall within the meaning of Regulation G (Disclosure of non-GAAP financial measures) and may provide its users of the financial information with additional meaningful comparison when reviewing the Company's results. KCS management uses non-GAAP information in its planning and forecasting processes and to further analyze its own financial trends and operational performance, as well as making financial comparisons to prior periods presented on a similar basis. Management believes investors and users of the Company's financial information should consider all of the above factors when evaluating KCS's results.

These non-GAAP measures should be viewed as a supplement and not considered a substitute for GAAP measures. Some of KCS's non-GAAP measures may differ from similar measures used by other companies, even if similar terms are used to identify such measures.

- (a) The Company believes adjusted diluted earnings per share is meaningful as it allows investors to evaluate the Company's performance for different periods on a more comparable basis by adjusting for the impact of changes in foreign currency exchange rates, and items that are not directly related to the ongoing operations of the Company. The income tax expense impacts related to these adjustments are calculated at the applicable statutory tax rate.
- (b) The Company believes adjusted operating expenses, operating income and operating ratio are meaningful as they allow investors to evaluate the Company's performance for different periods on a more comparable basis by adjusting for items that are not directly related to the ongoing operations of the Company.
- (c) Operating ratio is calculated by dividing operating expenses by revenues; or in the case of adjusted operating ratio, adjusted operating expenses divided by revenues.
